Reimagine Your Learning Space: Starbucks Your Classroom!
Oskar Cynerman, Teaching Channel
https://www.teachingchannel.org/blog/2016/07/29/starbucks-your-classroom/

Sterile, industrial-era rows aren't very attractive or motivating. Even more, I've become convinced that traditional educational settings dull the senses...I believe the "Starbucks" environment will promote that freedom and movement. Freedom is the key ingredient to social-emotional well-being and deeper learning. Rows and columns constrict. They hold and stills. That is the truth. That is the reality in many U.S. classrooms today. But no longer in mine. Never again.
“In Education 3.0, classrooms would move away from lectures, such as this one, to having class time be spent on discussions and projects, using digital technology.”

When did Elon successfully launch the SpaceX program? Who admitted that launching the car into space was "kind of silly and fun?"

What are the things Tesla designed? What were the things Tesla couldn’t determine the cause of?

How do you compare Elon Musk and Nicolas Tesla? How is Tesla different from Jupiter?

Why did Tesla build a plant in Colorado, not in New York? Why did Tesla even consider whether they were "electrical disturbances as are produced by the sun?"

If he did not devise ever-more sensitive receivers to detect these waves, what could have been the consequence? If he did not introduce the AC motor in the late 1880, what would have been the consequence?

A new grading tool called Gradescope — powered by AI and now being used for more than 175,000 students at 550 colleges — offers one window on the possibilities. The tool helps automate the grading process without requiring instructors to rely on multiple-choice tests, internal graders who are to say the automated has actually made it easier for them to personalize their teaching. At the University of Michigan at Ann Arbor, students in a statistics class last fall had their writing assignments evaluated by an automated text analysis tool.
