The One World Schoolhouse (Twelve, Oct. 2, 2012)**

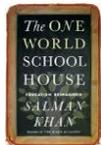

**Salmon Khan (2012).
The One World Schoolhouse**

**"The old classroom model simply doesn't
fit our changing needs. It's a
fundamentally passive way of learning,
while the world requires more and more
active processing of information."**

**Salmon Khan (2012).
The One World Schoolhouse**

**He explains that if students have consumed learning
content before class, "teachers can then carve out
face time with individual students who are
struggling; they can move away from rote lecturing
and into the higher tasks of mentoring, inspiring,
and providing perspective."**

flipping *noun*
'\fi-pin\

: learning strategy that offers preparatory or foundational content outside of the classroom and uses class time for active learning

March 12, 2014 The Flipped Learning Network

<http://www.flippedlearning.org/definition>

Definition of Flipped Learning

Flipped Learning is a pedagogical approach in which direct instruction moves from the group learning space to the individual learning space, and the resulting group space is transformed into a dynamic, interactive learning environment where the educator guides students as they apply concepts and engage creatively in the subject matter.

What is Flipped Classroom?

- A model of learning that rearranges how time is spent both in and out of class to shift the ownership of learning from the educators to the students (The NMC horizon report, 2014).
- The Flipped Classroom inverts teaching methods, delivering instruction online outside of class and moving homework into the classroom.

- Students watch online lectures at home at their own pace, communicating with peers and teachers via online discussion.

Flattened Classrooms and Learning Studios

Adjusting the Prescription: The School of Medicine overhauls its century-old educational approach.

Maura Singleton, February 2011, University of Virginia
http://uvamagazine.org/articles/adjusting_the_prescription/

Rx for Education

The traditional structure of medical education is undergoing a transformation from internal and external pressures alike. Old paradigms are giving way to fresher approaches.

IN	OUT
Applying knowledge	Regurgitating facts
Problem solving	Role learning
Dialogue	Lecture
Facilitating	Telling
Critical thinking	Memorizing
Simulation	Observation
Teams	Solo practitioners
Hands on	Passive listening
Individualized learning	One-size-fits-all
Self-directed learning	Top-down learning

Flattened Classrooms and Learning Studios

Adjusting the Prescription: The School of Medicine overhauls its century-old educational approach.

Maura Singleton, February 2011, University of Virginia
http://uvamagazine.org/articles/adjusting_the_prescription/

The Learning Studio: First-year medical students work in teams in the learning studio, a radical departure from the lecture hall. "One of the goals of this whole model—of having students do a lot of the learning themselves rather than passively listening—is that they need to be lifelong learners," says Randolph Canterbury, senior associate dean for education. (called the "flattened classroom")

April 30, 2014

Flipped learning skepticism: Can students really learn on their own?, Robert Talbert, Chronicle of Higher Education

<http://chronicle.com/blogs/work/castingdoubts/2014/04/30/flipped-learning-skeptical-learn-on-their-own/>

"Unfortunately this is a common misconception about the flipped classroom: That it's "learning on your own" without *any* guidance or support from an instructor... A misconception about the flipped classroom itself, that it is a pedagogy of abandonment, where students are loaded up with books and videos but then left to fend for themselves."

Toward a common definition of “flipped learning”, Robert Talbert, Chronicle of HE

<http://chronicle.com/blognetwork/castingoutlines/2014/04/01/toward-a-common-definition-of-flipped-learning/>

Four pillars:

Flexible environment (various modes of learning)

Learning culture (student-centered inquiry)

Intentional content (direct instruction b4 class)

Professional educator (reflective and accessible; collaborates and perfects one’s craft)

Flexible Environment

- | | |
|------------|---|
| F.1 | <input type="checkbox"/> I establish spaces and time frames that permit students to interact and reflect on their learning as needed. |
| F.2 | <input type="checkbox"/> I continually observe and monitor students to make adjustments as appropriate. |
| F.3 | <input type="checkbox"/> I provide students with different ways to learn content and demonstrate mastery. |

Learning Culture

- | | |
|------------|---|
| L.1 | <input type="checkbox"/> I give students opportunities to engage in meaningful activities without the teacher being central. |
| L.2 | <input type="checkbox"/> I scaffold these activities and make them accessible to all students through differentiation and feedback. |

Audience Polling Q#1: How get learners to do the work before class?

- **Model it**
- **Points awarded**
- **Test on it, email back 2-3 answers**
- **Make it an expected part of the community**
- **What else?**

Audience Polling Q#2: How else motivate to flip?

- **Grade their prework**
- **Inspire**
- **Share the purpose, rationale, objectives**
- **Use it**
- **Bring back former students for testimonials**
- **Build on it (not a one-off activity)**

6 Expert Tips for Flipping

1. **Use existing technology to ease faculty and students into a flipped mindset.**
2. **Be up front with your expectations.**
3. **Step aside and allow students to learn from each other.**
4. **Assess students' understanding of pre-class assignments to make the best use of class time.**
5. **Set a specific target for the flip.**
6. **Build assessments that complement the flipped model.**

Class time spent:

- **Problem solving activities;**
- **Case studies;**
- **Facilitated discussion;**
- **Other.**

Freddie Diaz-Batista, Flipped Learning, February 14, 2014, E-learning Blog

<http://freddiediazbatista.com/main/>

"One of the big mistakes we made when we pioneered this model is that we focused too much on video. We now like to use the term "learning object" when we talk about the flipped classroom. A learning object can include videos, but it also can be resources such as online simulations, books, and periodicals."

Why is flipping significant?

1. Students can watch, rewind, and fast-forward.
2. Stop and reflect.
3. Devote class time to application of concepts.
4. Better opportunity to detect errors in thinking.
5. Encourage social interaction and peer support.

Digital distraction in the classroom

July 11, 2012 by Stephanie Chasteen, The Active Class
<http://theactiveclass.com/category/uncategorized/>

"I no longer go to work to 'perform' five times a day; instead, I look forward to going [to class] and interacting with my students all day," says high school teacher Jonathan Bergmann...**In the flipped class, instructors create video podcasts for students to watch — either of lectures, or solving a problem, or demonstrations — and post those for the students to watch at home.**

Happening in College Too!

The Washington Post, Nick Anderson, March 11, 2013

http://www.washingtonpost.com/local/education/more-classroom-flipping-in-colleges/2013/03/11/0c42d758-8a7f-11e2-9889-3013c3c981e6_story.html

More on classroom flipping in colleges

View Photo Gallery — Flipping the classroom: University of Virginia professor Philip Zetlow is teaching a course called "The American South: Global History Since 1900." It's a massive open online course, which offers the world a free sample of education from the elite public university. The public is able to register for the course and watch the entire lecture for free, and follow up in the classroom with his lectures on their own time. Here's an overview of classroom hours for a depth discussion. This technique is known as "flipping" the classroom.

Flipping The Large Enrollment Psychology Classroom - NC State (Video: 3:45)

<https://www.youtube.com/watch?v=QTDQaaVWEzI>

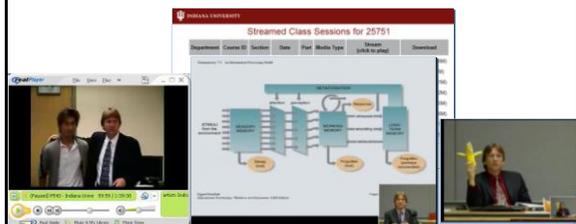

Ohio State Chemistry Flips the Classroom (Video: 1:10)

https://www.youtube.com/watch?v=6FA_hCmfsP8

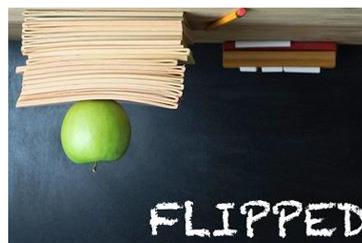

My First Attempt to Flip

- Ask students to watch weekly lectures.
- Reflect on key concepts.
- Instructors helps moderate it.

Flipped Classroom Research

February 5, 2014

Lessons Learned from 1,125 Flipped Classrooms
It's been 40 years since the Army first experimented with competency-based learning, Peter D. Lenn

<https://www.edsurge.com/n/2014-02-05-lessons-learned-from-1-125-flipped-classrooms>

The solution they decided to test was what we now call the "flipped classroom". After initial successes, the Army opened 1125 learning centers in every combat arms battalion worldwide. They also converted [Advanced Individual Training schools](#) to the flipped model. The result was the army was able to train over 500,000 soldiers for highly technical jobs with 85% reaching A-level competence in 40% less time than the prior conventional courses.

DODDS-Europe teachers find success with 'flipped classroom' approach

Stars and Stripes, Jennifer H. Swan
KAISERSLAUTERN, Germany

<http://www.atripes.com/news/dodds-europe-teachers-find-success-with-flipped-classroom-approach-1.266254>

Tried PBL and Cooperative Learning but students not coming to class prepared.

After the first year of flipping math...

- Traditional Approach: 77 D's and F's out of 265 students (2010-2011).
- Flipped: 29 D's and F's (2011-2012.)

Influences on cooperation, innovation and task orientation

Strayer, J. F. (2012). How learning in an inverted classroom influences cooperation, innovation and task orientation. *Learning Environments Research*, 15(2), 171-193.

Compares learning environments of an inverted introductory statistics and traditional introductory statistics classes at the same university.

- Less satisfied with the structure of flipped classroom than the traditional one,
- More comfortable and open to cooperative learning and innovative teaching techniques.
- The stability and connectedness of classroom learning communities higher.

How to embed inquiry and design projects

Warter-Perez, N., & Dong, J. (2012). Flipping the classroom: How to embed inquiry and design projects into a digital engineering lecture. In *Proceedings of the 2012 ASEE PSW Section Conference*.

Faculty at California State University flipped one introduction to Digital Engineering course with the goal:

1. Increasing quality of learning for collaborative PBL.
2. Address the prevalence of passive learning in engineering classroom and limited professor-student interaction in the large-scale classroom.

Findings: Flipped was effective in general, especially:

1. Improving understanding of course materials
2. Developing design skills.

Inverted classroom model in engineering statistics

Papadopoulos, C., & Roman, A. S. (2010). Implementing an inverted classroom model in engineering statistics: Initial results. *American Society for Engineering Statistics*.

Flipped engineering statistics. Findings:

1. Students more cooperative each other
2. Progressed faster thru learning materials;
3. Greater depth of understanding.
4. The student test scores higher than those in the traditional learning environment.

Missouri State U Improves Learning Outcomes With Flipped Course, Leila Meyer

<http://campustechnology.com/Articles/2014/05/21/Missouri-State-U-Improves-Learning-Outcomes-with-Flipped-Classroom.aspx?p=1>

Introductory Psychology (changed fall 2012).

Old Version = 30 percent improvement.
Flipped Class = 76 percent improvement
DFW rate from 24 percent to 18 percent

"and this is a much more rigorous course now" said Hudson. "When you think about it in terms of dollars and retention, that's pretty significant."

May 21, 2014 MyPsychLab from Pearson

Virtual Case Studies

Virtual Case Studies let students explore how a number of risk factors and protective factors may impact the development of a psychological disorder. These interactive scenarios help students understand, and then critically assess, the influence of biological, psychological, social, and cultural factors in the development or progression of a disorder.

Visual Brain

The interactive visual brain offers hands-on exploration that makes course content and terminology relevant, helping students better understand neuroanatomy, physiology, and human behavior. Available for Neuroscience and Introductory Psychology courses.
