'Those Jobs Are Gone'

Steve Kolowich, The Chronicle of Higher Education

<http://www.chronicle.com/article/Whos-a-UpWhos-Down-in/23986>

'Those Jobs Are Gone'

By Steve Kolowich | April 27, 2017

A recent California study of 10 public schools of higher education found that the new jobs in the state are going to be in the service sector, but that's not the case in the rest of the state.

The new jobs in the state, however, are not the ones that are going to be in the service sector.

No, the new jobs in the state are going to be in the service sector.

No, the new jobs in the state are going to be in the service sector.

No, the new jobs in the state are going to be in the service sector.

Wikipedia at 15

Celebrate or hate it as you will, writes Scott McLemee, Wikipedia has metamorphosed from its beginnings as a gangly cultural interloper into the de facto reference work of first resort.

January 15, 2016
by Scott McLemee

Wikipedia came into the world 15 years ago today — and, man, what an ugly baby. The first installment of it in the Internet Archive is from late March of 2001, when Wikipedia was already 10 weeks old. At that point, it claimed to have more than 3,000 pages, with an experienced base of contributors.

What I Learned When My Students Used Google Translate

Diane Loyet, The Chronicle of Higher Education
<https://www.chronicle.com/article/What-I-Learned-When-My/243017>

- I was very surprised by the results. They sent me examples of translations into English from Albanian, Chinese, Kazakh, Russian, and Spanish. The translations from Albanian, Kazakh, Russian, and Spanish were good. They were not perfect, but the mistakes were such that, had I encountered the sentences in a student paper, I would have attributed them to grammatical errors on the part of the non-native speaker of English. Here is one of the Spanish examples:
- Original Spanish: Si yo fuera tú, le cobrara hasta por respirar.
- Google Translate's English translation: If I were you, I'll even charge you for breathing.
- Accurate translation: If I were you, I would even charge him for breathing.

Pros and Cons of Virtual Reality in the Classroom

Adam Evans, The Chronicle of Higher Education
<https://www.chronicle.com/article/ProsCons-of-Virtual/2430167?cid=cp197>

Pros and Cons of Virtual Reality in the Classroom

Pro:

An art professor might virtually guide students in his rural-Kentucky classroom through an exhibit happening in Paris, allowing them not only to explore works of art but also to virtually hold and examine them up close. A biology class might virtually travel down DNA strands previously visible only through a microscope.

Con:

We need to be having conversations about the ethics of using virtual reality in the classroom. Just because we have the ability to virtually transport a student to a war-torn country or a historical moment in time does not mean we should do so without thinking of possible consequences. What ethical obligations might faculty members owe our students during these experiences?

April 8, 2018 How Ed Tech Is Exploiting Students Chris Gilliard, The Chronicle of Higher Education <https://www.chronicle.com/article/How-Ed-Tech-Is-Exploiting/2430207?cid=cp197>

How Ed Tech Is Exploiting Students

- Eric Tornøe, a professor at St. Thomas University, in Minnesota, and his team members saw a Microsoft demonstration of technology that could guess, with reasonable accuracy, ages and genders of people in the room. Thinking about other applications of the technology Tornøe quickly landed on the potential information hidden within students' emotions. He envisioned professors using that information to ensure that a greater percentage of their lecture material engaged students and stuck in their minds. Microsoft lent Tornøe's team the facial-recognition and emotion interfaces, free of charge, as well as the necessary software.
- Ashok K. Goel, a professor at the Georgia Institute of Technology, used IBM's "Watson" technology to test a chatbot teaching assistant on his students for a semester. He told them to email "Jill" with any questions but did not tell them that Jill was a bot.

HOW FRIGHTENED SHOULD WE BE OF A.I.?

By Tad Friend

PHOTOGRAPH BY MICHAEL O'NEILL

Some argue that the relationship between human and machine intelligence should be understood as synergistic rather than competitive. In "Turn of Mind: Rethinking Work in the Age of A.I.," Paul R. Daugherty and D.J. Patil, executives at Accenture, proclaim that working alongside A.I. "cobots" will augment human potential. Discounting all the "Robocalypse" studies that predict robots will take away as many as eight hundred million jobs by 2030, they cheerily title one chapter "Say Hello to Your New Front-Office Bots." Cutting-edge skills like "holistic melding" and "responsible normalizing" will qualify humans for exciting new jobs such as "explainability strategist" or "data hygienist." Even ardent types will have a role to play, as customer-service bots "will need to be designed, updated, and managed. Experts in unexpected disciplines such as human conversation, dialogue, humor, poetry, and empathy will need to lead the charge." The George Saunders story writes itself (with some assistance from his robot).
