Factors Leading to Success or Personal Change When Exploring Online  
(MIT OCW Group; Note: Check all that apply)

## MIT Data:

### Self-Taught on Social Media

(21-30 year old unemployed female, North America)

At first my purpose was to fulfill boredom ...**After graduating with a MS, I was faced with unemployment.** I took the opportunity to read blogs, watch Youtube videos, and more to learn about blogging and social media. Since then I have become well versed in social media and other business topics and started a business... **I decided not to pursue a PHD because I am learning a more rapid pace.** Instead of spending 5 years in school, I can be flexible and work on what I am learning.

## MIT Data:

### Prepares to Reenter University (41-50 year old male, Middle East)

Most interesting experience of my own was my use of MIT OCW to refresh on Calculus. I purchased the textbook and followed one of several calculus options on the site. **This was quite successful in re-introducing Calculus, as a prep to re-entering college 28 years after graduation - this time to study for a Master's.**

## MIT Data:

### Retiree Develops New Hobby (70+ year old female, North America)

**I'm an avid photographer and have developed skills for developing my own website for display of my photography and books I have written that include my photographs...**I've had multiple careers, from science, to public administration, and information technology. The development of my art is a new and exciting experience.

## Life Changing Example #1

**Yes. I plan to focus my Ph.D. research on alternative forms of learning (informal DIY) and credit (like open badges) and the changes higher ed and employers will have to make to accept these forms of credit.**

## Life Changing Example #2

It has made my job much easier and it's been easier for me to execute certain tasks, **making me more willing to take on bigger challenges.** It was also shown me how enjoyable it is to learn a computer language. It opened my mind to considering possibilities in this area. It also **made my husband respect my ability** around computers a bit more.

### Life Changing Example #3

My life has changed in a big way. **I used these new skills to create a small business** that supplements my income. I couldn't use this income solely to support myself, but it does pay some bills.

#### MIT Will Offer MOOC Curricula, Not Just Single Courses, on edX

September 18, 2013, by Steve Kolowich

MOOC companies are hardly universities unto themselves, but now a provider wants to move beyond offering one-off courses.

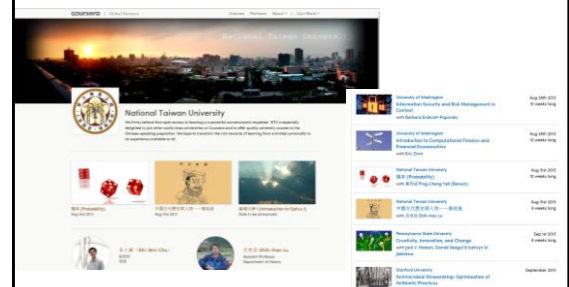

MITx, a division of the Massachusetts Institute of Technology that offers courses on the nonprofit edX platform, announced on Tuesday that it would soon offer special certificates to students who completed a prescribed sequence of massive open online courses from MIT. The sequences will be called XSeries.

The Open University's Martin Bean says UK universities cannot "stick their head in the sand"

Richardson is among the UK universities that have launched this emerging market.

A partnership of UK universities is launching an online project, challenging US universities that have dominated this emerging market.

They will aim to give the public access to higher education courses via computer, which is possible.
